

Important Safety Information

Attention and Warning Symbols

You must be aware of safety when you install and operate this equipment. This owner's manual provides various procedures that are intended to be done in the order presented. Failure to do the procedures in the order given or procedures that are done carelessly could result in possible injury to you, damage to equipment and/or property. Some procedures require special attention.

The **WARNING!** Symbol means that there is the potential of electric shock which could result in serious injury or damage to the equipment or personal property may result.

The **ATTENTION!** Symbol means you should pay special attention to: Important instructions for using this equipment, or important instructions for maintaining this equipment.

The Class II Symbol alerts qualified service personnel to use only identical Replacement parts in this equipment.

For Your Safety

To reduce the risk of fire or electric shock, do not expose this equipment to rain or moisture

Due to the thermionic nature of vacuum tubes, this equipment generates high levels of heat. Adequate ventilation must be provided. Do not restrict the ventilation slots or place on any surface that may restrict airflow.

Vacuum tubes and other nearby parts operate at extremely high temperatures. Keep such parts out of the reach of children.

High voltages exist which may be harmful. Do not operate this equipment with the top cover removed.

Internal fuses and other safety components are located inside this unit in accordance with BS 60065 requirements.

Should service be required where components need to be replaced with the exception of safety devices and vacuum tubes, all passive components are to be replaced with identical types only.

CE Declaration of Conformity

We declare under our sole responsibility that this product is in conformity with the following standards or standardised documents:

BS EN 60065 in accordance with the regulations 73/23/EEC, 89/336/EEC
(from 1st January 1997)
